

I don't have much to say but the organization should be going after the over modulated stations splattering all over the 20 meter band 10KC's running illegal power instead of picking on the Audio guys which IM a part of. I've herd the complaining on the air many time and if the complainer's would only check the rest of the 20 meter band they would have found out that they had the whole 20 meter to play with because very few stations wore on those days this is what I call poor Amateur Practice
